Attention: Ms. Heidi Wiebe **VIA FAX ONLY (867) 699 3166**

Dear Ms. Weibe;

RE: Regional Forum Follow Up Matters

Reference is made to our commitment to you and your organization at the February 2006 regional Forum in Hay River and to your correspondence in connection therewith.

We re-confirm our advice to you that we would be prepared to collaborate with the Committee as part of broader industry initiative to evaluate the cumulative effects matter raised at the regional forum. As was stated in Hay River, we are one Company that is part of a larger industry and we cannot make commitments on behalf of others. However we would be prepared to collaborate with the Committee and look forward to future opportunities to work with you.

We were encouraged to note the contributions made by Chief Harry Deneron in his presentation to the regional Forum in Hay River with respect to this cumulative effects matter. These efforts as part of an on-going collaborative dialogue with all parties can contribute to a positive balanced investment environment in the Dehcho.

Mr. Ron Antoine inquired about the timber removal that occurred during our 3D seismic in the Liard Valley. The original screening for the program and the evaluation of our avoidance cutting techniques conducted by the Acho Dene Koe concluded that 7500 cubic meters would be removed. This information is available on the Public Registry through the Mackenzie Valley Land and Water Board. Should you require further information we would recommend that you contact them in this regard.

We trust that this will be sufficient for your needs.

Respectfully;
Anadarko Canada Corporation
